

## **Biography**

### Matthew Hassink

Dr. Hassink is a Chemistry Team Supervisor at the Division of Product Science, Office of Science at the Center for Tobacco Products of FDA. His primary responsibility lies in data evaluation, and he believes that data standards will help ensure that submitted data is both usable and meaningful.

As a new member of the Tobacco Implementation Guide (TIG) project, Matthew is overseeing and working with a team in the Product Description workflow of the TIG v1.0 standard in collaboration with CDISC. Matthew also participates in several CTP projects related to data standardization and data management utilizing his experience with data evaluation and its challenges.
