

Biography

Chrissie Cai

Ms. Cai is a Data Quality Management Team Supervisor at the Division of Regulatory Science Informatics, Office of Science at the Center for Tobacco Products of FDA. Her passion lies in data standards, and she strongly believes that they play an essential role in ensuring that data is both usable and meaningful.

As a new member of the Tobacco Implementation Guide (TIG) project, Chrissie is currently overseeing the development of TIG v1.0 standards in collaboration with CDISC. Furthermore, she is leading the Data Governance and Data Management initiatives at CTP, constantly seeking ways to improve the data management processes and enhance data quality within her organization.
