

University of Kentucky Center for Tobacco Reference Products Workshop

**3:00-5:00 pm on September 15th prior to the start of the
73rd Tobacco Science Research Conference
Leesburg, Virginia USA**

- 3:00 Ruth McNees, Ph.D., University of Kentucky Center for Tobacco Reference Products. Update on the proficiency testing program using the 1R6F reference cigarette. Request for comments regarding proficiency testing using the certified reference smokeless tobacco products.
- 3:25 Guy Jaccard, Ph.D., Phillip Morris International. Mainstream smoke constituents and *in vitro* toxicity comparative analysis of 3R4F and 1R6F reference cigarettes. A comprehensive comparison of the traditional 3R4F reference cigarette and the new reference cigarette 1R6F.
- 3:50 Product demonstration and discussion. Examples of all CTRP reference products will be on display along with CTRP staff to discuss current and future research initiatives and proficiency testing plans. Input from TSRC participants is welcome and encouraged.
- 5:00 Dismiss for TSRC reception.

Funding for this workshop was made possible, in part, by the Food and Drug Administration through grant RFA-FD-14-001 and RFA-FD-15-026. The views expressed in written materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services; nor does any mention of trade names, commercial practices, or organization imply endorsement by the United States Government.
